For the past 24 years, Sunrise River Press has set the standard for school nurses concerning the formulation of individualized healthcare plans (IHPs) designed to fit unique student health issues. School Health Alert (www.schoolnurse.com) is very pleased to endorse the 2nd edition of IHP as a great resource for school nurses. This 2017 revised edition continues that tradition and provides a practical resource covering 66 chronic and acute conditions encountered daily by school nurses. It includes current pathophysiology and school nurse management for all conditions as well as extensive assessment lists that can be used when developing IHPs.

The individualized healthcare plans for each chapter include NANDA standardized nursing language with corresponding nursing interventions and expected measurable student outcomes; a case study and sample care plan; sample 504 accommodations, emergency action plans (EAPs), and emergency evacuation plans (EEPs), if the case study or condition warrants; and a “preliminary IHP” to initiate immediate healthcare in the school setting.

Special student issues IHPs include coverage of chronic health conditions; homeless students; and immigrant and refugee students; and medically complex, fragile and nursing7 dependent students. Chronic health conditions and medically complex chapters

Finally, six concept, framework and school nurse issues chapters round out this unique resource. Each chapter thoroughly discuss school nurse management of special issues covering using IHPs with other education, health, and home care agency plans; 504 plans and accommodations; special education – Individualized Education Programs (IEP) and the use of IHP information; Other health impairment (OH1) and the IHP; reimbursement for healthcare services; and HIPAA, FERPA, and the privacy of student health information in IHPs.

Accompanying the book is 12 months of exclusive access to an easy-to-use, FERPA compliant, cloud-based software application that aids in the development and creation of IHPs.

**IHP Creator** reduces the time it takes to create an IHP to mere minutes. Accessed using any modern web-browser, **IHP Creator** creates completely customizable IHPs for all 66 conditions found in the book. Access to student data is tightly controlled; information is moved between the user’s computer and the cloud using state-of-the-art encryption.
